

I'm a Cap-tel participant and I feel FCC should support this wonderful technology. I'm a past TTY user but used it very rarely as I hated it I felt I was talking to a dead fish. I'm a Cochlear Implant recipient and I can now hear and this Cap-tel is a excellent listening tool for benefit my Implant. Cap-tel is wonderful for the deaf and HOH and the elderly. Please consider supporting Cap-tel. I highly recomend it for all Deaf and HOH people. Especially the HOH since some may have some residual hearing left. Thank you. Julie Springer (cap-tel participant
